NECK BRACE VS NO BRACE

x x x x x

% REDUCTION IN FORCES COMPARED TO NO BRACE

RESULTS FROM LEATT®'S IN-HOUSE LABORATORY TESTING

HYPEREXTENSION: Over-bending of the head in rearward direction. | **POSTERIOR HYPERTRANSLATION:** Extreme movement of head and helmet, rearward on the neck. | **HYPERFLEXION:** Over-bending of the head in forward direction. | **LATERAL HYPERFLEXION:** Over-bending of the head to one side. | **COUPLED AXIAL LOADING:** Helps prevent axial loading only when the axial forces act in combination with other mechanisms.

GOING GREEN

At Leatt, we not only care about your safety, but also about the safety of this awesome planet we live on. Where we have the freedom and the privilege to experience trails surrounded by nature in all its glory, while doing what we love most, riding. With a bigger plan on our minds, we begin our eco-friendly mission, with our packaging. All good things take time, and we are determined to ensure that Leatt continues taking steps in the right direction towards sustainability and using renewable resources which have a lesser effect on our planet. Finding solutions to problems is in our DNA - this is the biggest problem we have faced yet, but together we can make a change and we can make an impact.
